

Power Amplifiers

Three Channel Series

Unique 3 Channel amplifiers (A (Left), B (Right) and summed mono Sub-woofer channel) with onboard speaker processor. Ideal for all applications, including multimedia installations. Straightforward Plug and Play setup.

AmbiDrive 180w/4 ohms + 180w/4 ohms + Sub 210w/4 ohms

MicroDrive 250w/4 ohms + 250w/4 ohms + Sub 320w/4 ohms

PowerDrive 500w/4 ohms + 500w/4 ohms + Sub 1,050w/2 ohms

Rear view of **MicroDrive** amplifier, showing Aux input to the Sub channel (when a sub is not required), plus Left, Right and Sub Speakon outputs

SX/ZX Series

These heavy duty models feature XLR Balanced inputs and loop outputs, dual speed fans, UltraFin heat exchangers, switchable Anti-Clip, and TotalProtection™ circuitry

SX1500 700 watts RMS per channel into 4 ohms

SX3000 1,000 watts RMS per channel into 4 ohms

ZX3200 1,200 watts RMS per channel into 2 ohms

Rear view of SX and ZX series amplifiers, showing XLR inputs, input loop outputs and Speakon outputs

ZR'C' Installer Series

Contractor series for driving 70V or 100V constant voltage distributed systems. These are dual channel units internally fitted with toroidal output transformers

ZR350 'C' 100 + 100 watts RMS into 70 or 100v line; primary output transformer winding 8 ohms

ZR550 'C' 200 + 200 watts RMS into 70 or 100v line; primary output transformer winding 8 ohms

ZR850 'C' 300 + 300 watts RMS into 70 or 100v line; primary output transf

Rear view of **ZR 'C'** amplifier

Note that all ZR 'C' Series amplifiers can also be ordered with 70.7 V (70 Volt) outputs
